

Digitalization Internship

Digital Hub Barcelona

Start: Februar 2019

SIEMENS

Ingenuity for life

The Hub

We are looking for YOU to participate in the ramp-up of the newly established **Digital Hub** in Barcelona. For a minimum of four months, you will help to bring digital services to Siemens Power Generation customers and work with new IoT applications for the energy sector.

We promote the Siemens Omnivise Digital portfolio and together with our customers, we develop new business models and facilitate the development of innovative digital solutions applying Design Thinking techniques.

Your Challenges

You will work with the Director of the Digital Hub and be involved in:

- Showcasing of Digital Solutions such as Virtual & Augmented Reality
- The Hub's communication via internal and external Social Media channels as well as Microsoft SharePoint
- Planning and realization of events
- Designing slides with Microsoft PowerPoint for internal and external presentations
- The daily work of the Digital Hub

Your skills

- You are a student of Business Sciences, Communication Sciences or similar field of study
- You are self-driven, dynamic, structured and feel comfortable with working in an international environment
- You are excited and curious about new technologies
- You navigate Social Media with ease
- You speak English fluently; Spanish and German are a strong plus
- You have experience with MS Office, MS SharePoint

Please send your CV to Alexander
